

Guidance:

You can use this sheet to sketch how the leaves of your design will wrap around the pendant bracket.
 All glass must be outside of the inner dashed circle.
 The outer dashed circle represents the outside of a two layer thick fused leaf.
 Try to make the attachment points near the middle of the leaf, so the leaves will hang straight.
 Draw at least two leaves to ensure they don't interfere.
 Use the resulting design to set the dimensions of your leaves, position them on the slumping mold and know where to drill the attachment hole.

Example:
