

Guidance:

You can use this sheet to sketch how the leaves of your design will wrap around the pendant bracket.

- All glass must be outside of the inner dashed circle.
- The dashed circles represent the sides of a two layer fused leaf.
- Try to make the attachment points near the middle of the leaf, so the leaves will hang straight.
- Draw at least two leaves to ensure they don't interfere.
- Use the resulting design to set the dimensions of your leaves, position them on the slumping mold and know where to drill the attachment hole.

Example:
